

NEWCASTLE & HUNTER ANIMAL CONTROL

Anti-Snake Repellent Spray

How It Works

Our Snake Repellent Spray has been designed to interfere with the snake's sensory organs. Snakes flicker their tongue to taste the air particles to sense food, danger, water and shelter. As they taste the repellent it sends them into a state of confusion making them unable to detect their own trail, the trail of other snakes, food, water and shelter.

IT DOES NOT HURT THE SNAKE.

There are no chemicals or gadgets out there that will stop snakes like a brick wall.

What It Is

It is a makeup of residual insecticides. It's safe to use around households, pets, livestock etc. Our repellent comes with a **3 month warranty** which includes free trapping and removal of any snake trapped inside the repellent barrier.

Cost of Repellent

First 16 Lt backpack **\$190.00**, every subsequent pack **\$150.00**

One back pack does a normal residence, around the house fence line gardens. Lawn & edges must be cut short before spraying repellent.
